

Are You In?

Even though you can turn your tap on and have water whenever you need it, we don't have an endless supply of water.

What are you doing to save water?
We want to hear about it.

Take the water conservation pledge at

The My Drop Counts water conservation campaign is a program of the Metropolitan North Georgia Water Planning District.

Our Water Story

Rainfall varies significantly from year to year. The rivers that supply our water are relatively small because we are located near the headwaters, or origins, of the streams and can only withdraw so much. We can't get much water from the ground because beneath our soil is a layer of thick granite!

Where does our water come from?
