

Catoosa Utility District Authority's primary goal is to deliver safe, potable drinking water to our customers. The health and safety of our customers and employees is of the utmost importance in the delivery of this critical service.

In effort to remain vigilant and prepared, we are taking prudent actions as instructed by the Center for Disease Control, as well as other state and federal organizations. We are continually monitoring and evaluating information related to the coronavirus (COVID-19). This will allow us to support our customers and employees by taking precautionary measures to reduce the risk of exposure.

If you need assistance relating to a new service, your water bill or questions regarding your service; we would like to encourage you to utilize alternate methods of reaching us via:

Phone: 706-937-4121

Email: CustomerService@catoosautility.com

Catoosa Utility District Authority is committed to producing and delivering the best-quality drinking water. Our water supply is groundwater source, which means it is not exposed to air and is not subject to direct pollution and contamination like a river or reservoir. It is important for you to know that our water meets or exceeds all federal and state drinking water requirements.
